

PRESEEDER[®]

LANDSCAPING TILLER

MODEL 365 WALK-BEHIND

Perfect for Small Yards – The Preseeder compact power rake is the most cost-effective means of seedbed preparation available today. Till, level, and rake the soil for perfect soil preparation. The 36"-wide Preseeder compact power rake is ideal for smaller yards. Its hydrostatic drive enables you to choose the perfect ground speed for your jobs. Complete seeding projects quickly to boost your bottom line.

Refurbish Turf – Ten-position depth adjustments allow gentle or aggressive action for refurbishing existing turf. Stir surface soil for over-seeding without damaging the existing lawn, or till deep to totally remove the grass for a new seedbed. It's your choice. The Preseeder compact power rake becomes a refurbishment miracle worker.

Tills, levels, and rakes small areas

All-in-One Machine – The walk-behind design represents a new wave in preparation of turf seedbeds. A complete power rake package can be easily hauled in most pickups, eliminating the need to buy a large truck or trailer. Don't be fooled by its size, you will be surprised at how big this little machine performs.

Cost-Effective – Keep your investment low with the Preseeder compact power rake. No need to invest in an expensive power unit and a separate landscaping attachment. The model 365 is a complete package at an affordable price.

Ease of Use – Operation of the Preseeder compact power rake is simple. Easy-to-use controls make operation straightforward. All drive controls are at your fingertips for handy access, low physical effort, and safety. You'll be seeding more areas, faster than you ever thought possible.

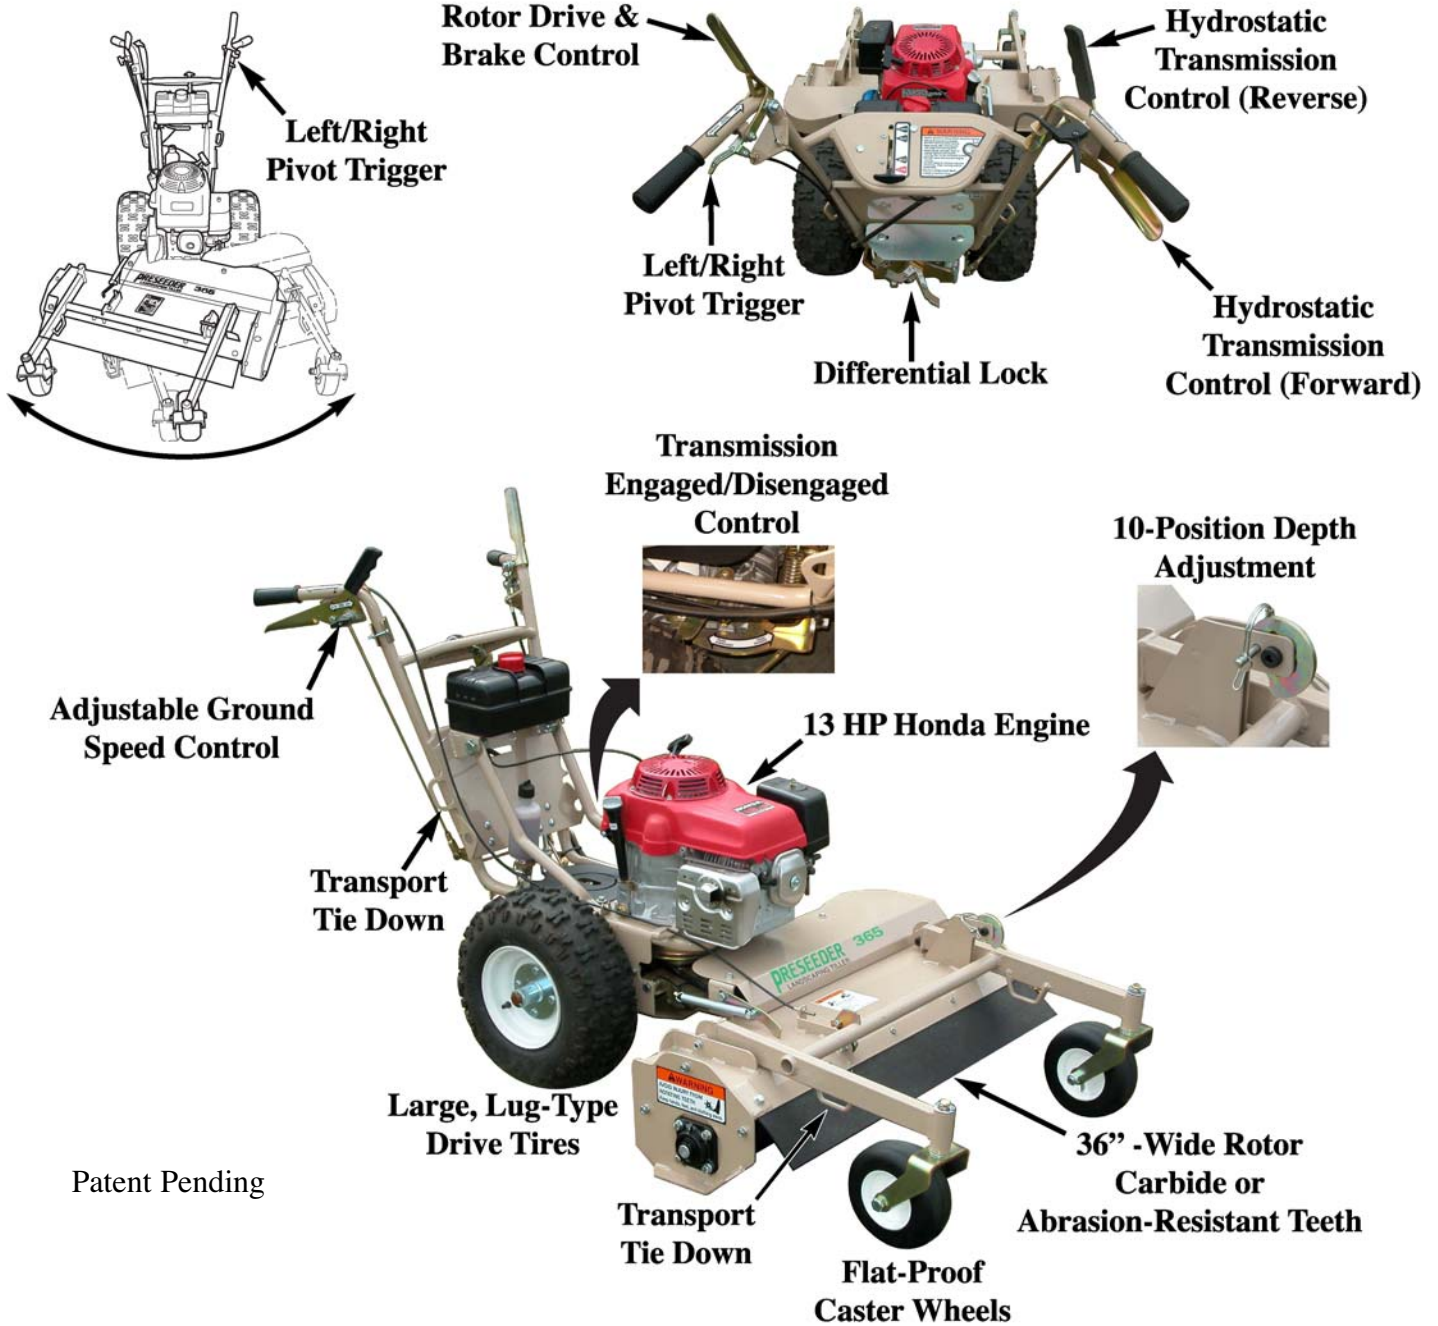

Maneuverable – Get into tight areas that are not accessible with a tractor or a skid steer loader. Parking lot islands, narrow areas along sidewalks, small corners of large jobs, and difficult-to-reach residential yards are easily accessed with the model 365. Mechanical seedbed preparation has never been available in such a compact package.

Works close to obstacles
